Work Experience

Full Stack JavaScript Developer

BitNorm

May 2021 – Present

- Implemented 20+ system and application designs for the Bitnorm ecosystem on both the frontend and backend.
- Analyzed 50+ user requirements to derive technical software designs and performance requirements.
- Wrote 200+ unit and integration tests to verify the functionality of user interfaces, backend processing and database interactions.
- Provided technical guidance to colleagues during CoPs for shared knowledge.
- Developed, maintained and enhanced 10+ APIs critical to the Bitnorm platform.
- Prepared and reported project status updates to senior managers.
- Participated in weekly code reviews to ensure code quality and system efficiency.

IT Support Technician

Kenya Ports Authority

May 2019 – August 2019

- Together with a team of 4 colleagues we undertook a project to design and install Digital Email Signatures to all the employees to enhance authenticity of communication within the company.
- Lead a team of support technicians in performing OS upgrades from windows 7 to 10 on more than 150 PCs and also provided basic training to employees on the usage of the new Office 365 suite resulting to an increase in overall productivity of employees.
- Worked with senior support staff to respond and service SAP related issues to ensure smooth running of day-to-day operations.
- Responded to calls from employees at the IT Support Help desk on different support issues and diligently serviced their requests either remotely or with the help of other support staff in the field.
